

WHO WE ARE

Redclan Consulting Services (RCS) is in the business of business improvement. RCS is based in Guyana, geographically located in South America and historically tied to the Caribbean. The suite of consulting services provided by RCS enables businesses and organizations to improve their operations so that they can achieve their best. Our core services in the areas of management systems, project management and international trade and development are designed to get right to what you need to streamline your operations so that there is consistency, reliability and growth within your business and organization. We are backed by our specialist knowledge and experience gained from working with stakeholders from private, public and intergovernmental organizations.

OUR VISION

The preferred provider of business improvement services.

OUR MISSION

Provide professional, quality and honest business improvement services that enable businesses and organizations to achieve their best.

WHY CHOOSE RCS

Our Professionalism: High standards are important to us which embody our professional consulting services. These are standards of quality, integrity, respect and accountability.

We Are Experienced: The experience in our services is rooted in competence which we have gained through working with a range of stakeholders from private, public and intergovernmental organizations.

Our Flexibility: The COVID-19 pandemic has shown us we have to be ready to adapt to the prevailing conditions of the environment. We are flexible as we strive to meet the needs of our clients in the changing environment so that they can succeed.

The Value We Bring: We are not just concerned about providing our consulting services. We ensure our consulting services add value to your business or organization by identifying ways to improve your operations.

WHAT WE DO

Management Systems Service

Do you want to be able to bid for contracts in the oil and gas sector but lack ISO 9001 certification?

Are you looking to export your food products but need to meet international food safety standards?

Do you want to be trained in the requirements of an international standard?

Have you implemented an international standard and want a checkup of your system?

If your answer is yes to any one of those four questions, then the Management Systems Service of RCS is for you.

Our Management Systems Service helps you to establish, implement, maintain and improve various management systems that are based on the requirements of international standards.

The most popular international standard is ISO 9001 which ensures that a company meets its customer and any applicable regulatory requirements. Other international standards we help you with include ISO 14001 for environmental management; ISO 22000, HACCP (Hazard Analysis Critical Control Point) and GMP (Good Manufacturing Practices) for food safety; ISO 45001 for occupational health and safety; ISO 15189 for medical laboratories; ISO/IEC 17020 for inspection bodies; ISO/IEC 17025 for testing laboratories; and ISO/IEC 17065 for certification bodies.

We help you to gain certification or accreditation to any of the above mentioned international standards by firstly conducting a gap analysis to find out what level you are at so that we know what are your needs. Then, we train you on the requirements of the standard, help you prepare all the documentation required and guide you to implement the requirements in your company. We also conduct internal audits that work like a checkup for the standard implemented at your company.

International Trade and Development Service

Are you looking to export your product or service to a new market?

Do you need to know the requirements for your product or service to enter a new market?

Is there a business report that you need to have written?

Would you like to conduct research in a particular topic?

If your response is yes to any one of those questions, then RCS' International Trade and Development Service is what you need.

We take care of the hassle of finding out the requirements for your products or services to enter new markets. Thus, giving you more time to focus on developing your capacity to be able to meet those requirements so you are better equipped to export your products or services.

Our report writing is done in a concise, logical and easy to read format. This means that you are able to be informed, illuminated and inspired by what the report has to say.

When we conduct research and analysis, we ensure the information produced is based on facts and easy to understand. Our research and analysis provide the critical information that you need to make prudent decisions and pursue viable solutions. We can do quantitative research involving surveys or qualitative research requiring the review of documentation.

Project Management Service

Do you want to establish a strategic plan to guide the direction of your company?

Do you need training in project management?

Are you designing or implementing a project and need project management support?

Have you completed the implementation of a project and want to have it evaluated to see if it met its objectives?

A yes to any one of those questions means that the Project Management Service from RCS is just right for you.

In order to help you develop your strategic plan, we conduct a detailed analysis of your company's internal and external environments so that the strengths and weaknesses as well as the opportunities and threats can be clearly identified. This identification helps you to capitalize on your company's strengths and opportunities plus reduce any adverse effects of the weaknesses and threats.

We possess PMP (Project Management Professional) certified project management skills that help you to initiate, plan, execute, monitor and close your project. These skills are applied to our in-depth project management training that covers theoretical and practical aspects to ensure a solid grasp of the principles of project management is gained.

We ensure your project's objectives are delivered through monitoring the project scope, project budget and project schedule. Additionally, emphasis is also placed on ensuring the high quality of deliverables, the management of risks and the engagement of all stakeholders so that they get the benefits expected.
